TO WHOM IT MAY CONCERN

Dear Sir/Madam,

RE: RECOMMENDATION FOR ATTACHEMENT

We are a training institute based at Wilson Airport offering Degree course in Aeronautical Engineering, Diploma and Certificate level courses in Aeronautical Engineering – (Airframe, Power Plant), Avionics Option, Diploma in Electrical Engineering, Diploma in Flight Operations and Dispatch, Dangerous Goods Regulations and Cabin Crew among others.

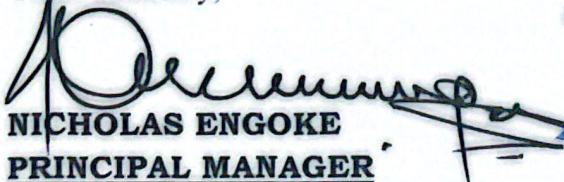

Kenya Aeronautical College is an institution registered by the government of Kenya accredited by Kenya National Examination Council (KNEC), Commission for University Education (CUE). We are also in collaboration with Shenyang Aerospace University in China to offer Aerospace undergraduate programs.

This serves to recommend our student who is completing his Diploma in flight Operations and Dispatch.

Our key objective is to produce highly trained and skilled Aviation industry personnel and thus the need for our students to gain industry exposure through industrial attachment. It is for this reason we recommend one of our students **Omanga Ndjekondo** attachment opportunity at your highly esteemed organization. We shall be grateful if the student is assisted in attaining this noble goal.

Thank you in advance.

Yours faithfully,

NICHOLAS ENGOKE
PRINCIPAL MANAGER
